

# Miles King

Software Engineer

## SUMMARY

Creative, detail-oriented, software engineer with a passion for puzzle solving. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company whose products can add value to the lives of everyday people.

## Recent Projects

**MettatonEX Bot** – Discord chat bot that integrates with a user's discord server to automate multiple simple tasks. Functions can be enabled to give automated responses to chat messages or slash commands, automatic notifications of posts to other sites, or server moderation.

**MoreStockImages** – Allows user to search a database of non-copyrighted images for use in creative or artistic projects. Allows user to download image and view information about the original image.

**InfiniteCrayons Color Palette** – Users can randomly generate color palettes with options to keep or refresh colors with each iteration. They can modify the generated color palettes and are given hex codes for the colors generated. Once a desired color palette is found, it can be saved to a library of preferred color palettes for later use.

## WORK EXPERIENCE

### Full Stack Web Developer at Miles King Dev | Houston, TX

April 2022 — Present
